IN THE CLAIMS

Cancel claims 20-23.

Allowable Subject Matter

4. Claims 11, 13, 16, and 17 are directed to an allowable product.
5. The restriction requirement as set forth in the Office action mailed on May 9, 2008, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 18 and 19, directed to methods of reducing the particulate matter on a surface by wind using the mat of claim 11, are no longer

withdrawn from consideration because the claims require all the limitations of an allowable claim.

6. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 18 and 19, directed to a method of reducing the particulate matter on a surface by wind using the mat of claim 11, previously withdrawn from consideration as a result of a restriction requirement, are hereby REJOINED and fully examined for patentability under 37 CFR 1.104.

7. Claims 18 and 19 are also allowed.

8. In view of the withdrawal of the restriction requirements as to the rejoined inventions, applicants are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

9. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

10. The following is a statement of reasons for the indication of allowable subject matter: the closest prior art, WO 02/39857 to Reynolds, does not appear to teach the specific mat and helicopter landing mat for reducing the disturbance or particulate matter by wind created during the landing of a helicopter on the mat, comprising the first and second layers of knitted material having the claimed stitch length, separated by the claimed average separation, and each layer having the claimed porosity, resulting in the claimed wind attenuation factor for each layer. Specifically, Reynolds does not teach or suggest tailoring such characteristics of the mat

disclosed by Reynolds, to reduce the disturbance of particulate matter by wind created during the landing of a helicopter on the mat, to arrive at the claimed wind attenuation factor.

11. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a). Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
